contaminate up to one million gallons ofwater? Human activity

is largely responsibe for stormwater pollution. Anything that goes on the grounder own the storm than can endup in our lakes, rivers, and eventually our clinking water. Examples of sto rmwater pollution include vehicle washing and naintenance in parking lots, dimping trash or wastewater into storm thans, and llowing runoffom pressure washing into storm thans.

after in the USF storm sewer system enters Lake Ehnke another area streams, eventually running into the Hillsbrough River. In general, curbohins another with open metal grates are part of the USF storm sewer system. Any ischarge to these structures, intentionally or accientally, is an illicit ischarge and prohibe at USF.

Remember - 61y Rain Down the Drain!
