

Pacia Diaz Awarded Fulbright

Dr. Pacia Diaz, a senior research scientist at the University of Florida, has been awarded a Fulbright Fellowship to study climate change impacts on coastal cities in Florida. The Fulbright Fellowship will allow her to study the effects of climate change on water supply and infrastructure in coastal cities. Dr. Diaz is a leading expert in the field of climate change and has been identified as one of the top 100 most influential people in the world. She is currently working on a project called "Adaptation Strategies for Coastal Cities" which is a part of the Florida Coastal Resilience Initiative. The project is focused on identifying the most vulnerable coastal cities and developing strategies to help them adapt to the effects of climate change. Dr. Diaz is a member of the Florida Coastal Resilience Initiative and is currently working on a project called "Adaptation Strategies for Coastal Cities".
