EXPORT CONTROL	
	1. Does the proposed technology (if any) involve potential military application or defense technology, software, or other defense articles? 2. Does the project require travel to foreign countries? 3. Is any member of the project team a foreign national? 4. Does the project involve anything with a strong potential dual use (Civilian, commercial and military) application?

COMMUNITY BASED PROJECT   , ask whether the project involves partnerships and/or beneficiaries at the local or regional level or if it has immediate or short-term possibilities to help solve problems that affect the citizens of this locality or region. If the an

USE OF PROTECTED HEALTH INFORMATION

Researchers proposing to use   (any individually identifiable human health information, including demographic information and biological specimens) in the course of their project must review the Health Insurance Portability and Accountability Act (HIPAA) Compliance Program information. The purpose of the HIPAA Compliance Program is to ensure that research studies involving use, disclosure or collection of   5
